PROJECTS

Dot co. – frontend developer

July ٢٠٢٣ – Sep ٢٠٢٣

TypeScript | Reactjs | Redux | SASS | MaterialUI

- Dot is a software house for a group of restaurants that builds related software applications.
- We build and maintain an ERP system to manage restaurant's inventory, cashier, warehouses, etc....
- My responsibilities :
 - ✓ Building UI for different layouts.
 - ✓ Integrating with backend APIs.
 - ✓ Documenting and debugging the already working system.

AbuTable LMS - frontend Developer

Sep ٢٠٢٣ – Present

TypeScript | Reactjs | Redux | SASS | MaterialUI

- AbuTable is an LMS (Learning Management System) designed for schools, it likely serves as a comprehensive platform to facilitate various aspects of education management,
- AbuTable may provide tools for creating, organizing, and managing courses. This could include features for adding course content, setting assignments, and tracking student progress.
- The system has user management capabilities, allowing administrators to create and manage user accounts for teachers, students, and other staff members.
- My responsibility
 - ✓ Building UI for different layouts.
 - ✓ Integrating with backend APIs.
 - ✓ Documenting and debugging the already working system.
